TASK 3 – Angry Customer

Hello,

      I understand your wish. We also do everything possible to add "Office 2013 style" in all Telerik WPF Controls. This is not easy and we need more time to make it. I hope to the end of the year "Office 2013 style" will come. Until then I suggest you to use other style which like "Office 2013" or customize one of the other styles. You can search in the internet how to customize your controls.

If you have problems with customization I will be glad to assist you.

Regards XXX
